

# DESIGN PHASE 10/26

---

26 October 2024 / 6:00 PM / Virtual - Discord

## ATTENDEES

Andrew Tang, Anthony Kungo, Chen Li, Connor McMillan

## AGENDA

### New Business

- Start brainstorming a list of classes for the client
- Discuss how we are going to store data on the server side

## NOTES

- Do we need to support multiple universities?

## ACTION ITEMS

1. Chen Li: Ask the professor if we need to support multiple universities.
2. All: Start implementing classes per the SRS and Design documents. Refer to the Gantt chart (located here) to see what you are responsible for.
3. All: Remember to **fetch from origin each time you are to begin working and after working**. This will help us stay in sync and make classes available to each other quicker.

## NEXT WEEK'S AGENDA

Discuss progress on server and client implementation.

Discuss any issues or concerns throughout the implementation & testing phase.
